

## To Install Glass

1. Remove plastic retaining ring (A) and glass spacer (B) from the socket assembly (D).
2. Place decorative glass (C) over socket assembly.
3. Carefully place clear glass spacer (B) over socket assembly inside of decorative glass. Do not drop spacer into place doing so will likely break the glass.
4. Replace retaining ring (A) and tighten to secure glass. Do not over-tighten.

**Note:** A cardboard tube has been supplied to facilitate installation of the retaining ring. To use the tube, push the small side of the ring into the tube. Cutting into the tube approximately 1/2" from the end on opposite sides with a pair of scissors may allow the ring to fit into the tube more easily.
